

# RF Exposure Evaluation Declaration

Product Name: LED lamp

Model No. : 9290022166

FCC ID : 2AGBW9290022166X

Applicant: Signify (China) Investment Co., Ltd.

Address: Building no.9, Lane 888, Tianlin Road, Minhang

District, Shanghai 200233, China

Date of Receipt: Feb. 25, 2019

Test Date : Feb. 26, 2019~ Apr. 16, 2019

Issued Date : Apr. 19, 2019

Report No. : 1922075R-RF-US-P20V01

Report Version: V1.0

The test results relate only to the samples tested.

The test results shown in the test report are traceable to the national/international standard through the calibration of the equipment and evaluated measurement uncertainty herein.

This report must not be used to claim product endorsement by A2LA or any agency of the government.

The test report shall not be reproduced without the written approval of DEKRA Testing & Certification (Suzhou) Co., Ltd.

## **Test Report Certification**

Issued Date: Apr. 19, 2019

Report No.: 1922075R-RF-US-P20V01

Product Name : LED lamp

Applicant : Signify (China) Investment Co., Ltd.

Address : Building no.9, Lane 888, Tianlin Road, Minhang District,

Shanghai 200233, China

Manufacturer : Signify (China) Investment Co., Ltd.

Address : Building no.9, Lane 888, Tianlin Road, Minhang District,

Shanghai 200233, China

Model No. : 9290022166

FCC ID : 2AGBW9290022166X

Brand Name : PHILIPS

EUT Voltage : 110-130 Vac, 50-60 Hz, 9.5W

Test Voltage : AC 120V/60Hz Applicable Standard : KDB 447498D01V06

FCC Part1.1310

Test Result : Complied

Performed Location : DEKRA Testing & Certification (Suzhou) Co., Ltd.

No.99 Hongye Rd., Suzhou Industrial Park, Suzhou, 215006,

Jiangsu, China

#### 1. RF Exposure Evaluation

#### 1.1. Limits

According to FCC 1.1310: The criteria listed in the following table shall be used to evaluate the environment impact of human exposure to radio frequency (RF) radiation as specified in 1.1307(b)

#### LIMITS FOR MAXIMUM PERMISSIBLE EXPOSURE (MPE)

| Frequency<br>Range (MHz)                                  | Electric<br>Field<br>Strength<br>(V/m) | Magnetic<br>Field<br>Strength<br>(A/m) | Power Density (mW/cm2) | Average<br>Time<br>(Minutes) |  |  |
|---|--|--|------------------------|------------------------------|--|--|
| (A) Limits for Occupational/ Control Exposures            |  |  |                        |                              |  |  |
| 300-1500  |  |  | F/300                  | 6                            |  |  |
| 1500-100,000  |  |  | 5                      | 6                            |  |  |
| (B) Limits for General Population/ Uncontrolled Exposures |  |  |                        |                              |  |  |
| 300-1500  |  |  | F/1500                 | 6                            |  |  |
| 1500-100,000  |  |  | 1                      | 30                           |  |  |

F= Frequency in MHz

Friis Formula

Friis transmission formula: Pd = (Pout\*G)/(4\*pi\*r2)

Where

Pd = power density in mW/ cm<sup>2</sup>

Pout = output power to antenna in mW

G = gain of antenna in linear scale

Pi = 3.1416

R = distance between observation point and center of the radiator in cm

Pd is the limit of MPE, 1 mW/cm<sup>2</sup>. If we know the maximum gain of the antenna and the total power input to the antenna, through the calculation, we will know the distance r where the MPE limit is reached.

Report No: 1922075R-RF-US-P20V01

#### 1.2. Test Procedure

Software provided by client enabled the EUT to transmit and receive data at lowest, middle and highest channel individually.

The temperature and related humidity: 18 and 78% RH.

### 1.3. Test Result of RF Exposure Evaluation

| Product   | • | LED lamp               |
|-----------|---|------------------------|
| Test Item | : | RF Exposure Evaluation |
| Test Site | • | AC-6                   |

#### Antenna Information:

| Antenna manufacturer | N/A         |          |             |                            |  |    |  |           |
|----------------------|-------------|----------|-------------|----------------------------|--|----|--|-----------|
| Antenna Delivery     | $\boxtimes$ | 1*TX+1*R | 1*TX+1*RX   |                            |  | RX |  | 3*TX+3*RX |
| Antenna technology   | $\boxtimes$ | SISO     |             |                            |  |    |  |           |
|                      |             | MIMO     |             | Basic                      |  |    |  |           |
|                      |             |          |             | CDD                        |  |    |  |           |
|                      |             |          |             | Beam-forming               |  |    |  |           |
| Antenna Type         |             | External |             | Dipole                     |  |    |  |           |
|                      |             | Internal |             | PIFA                       |  |    |  |           |
|                      |             |          | $\boxtimes$ | PCB                        |  |    |  |           |
|                      |             |          |             | Ceramic Chip Antenna       |  |    |  |           |
|                      |             |          |             | Stamping Antenna           |  |    |  |           |
|                      |             |          |             | Metal plate type F antenna |  |    |  |           |
|                      |             |          |             | Monopole antenna           |  |    |  |           |
| Antenna Gain         | -1.22dBi    |          |             |                            |  |    |  |           |

Report No: 1922075R-RF-US-P20V01

#### Power Density:

The tune-up power is 0.5dB, so the maximum conducted power of BT we used to calculate RF exposure is 10.55dBm.

| Test Mode | Frequency Band<br>(MHz) | EIRP<br>(dBm) | Limit of Power  Density  S(mW/cm²) | Power Density at R = 20 cm (mW/cm <sup>2</sup> ) |
|-----------|-------------------------|---------------|------------------------------------|--|
| BT        | 2400 ~ 2483.5           | 9.33          | 1                                  | 0.0017   |

Note: The maximum power density is 0.0017mW/cm<sup>2</sup> for LED lamp without any other radio equipment.
